SUMMARY

Front-end-focused Full Stack Developer with 3 years of experience turning ideas and designs into clean, fast, and dependable web products. I enjoy crafting interfaces that feel effortless to use, and I'm just as comfortable working across the full stack to bring a product to life from start to finish. I've helped ship large-scale government dashboards, SaaS products, and real-time systems used by hundreds of thousands of people. I care deeply about quality, performance, and building things that are easy for a team to maintain and grow.

EXPERIENCE

StarSphere — Front-end Developer *Sep 2025 – Present*

- Build and maintain responsive web applications using React and Next.js
- Collaborate with designers to implement pixel-perfect UI components
- Improved application load time by 40% through code optimization and lazy loading
- Ensure cross-browser compatibility and mobile-first responsive design

Lightring Technology — Front-end Developer *Jul 2025 – Aug 2025*

- Developed reusable React components for internal dashboard systems
- Integrated RESTful APIs and managed application state with Redux Toolkit
- Collaborated with the backend team to ensure seamless data flow
- Delivered 5+ projects on tight deadlines while maintaining code quality

The Golden Castle — Front-end Developer *Feb 2025 – Jul 2025*

- Developed interactive user interfaces using React and Tailwind CSS
- Built responsive, mobile-first layouts across all device sizes
- Conducted code reviews and mentored 3 junior developers
- Improved website performance and SEO through optimization and best practices

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript
Front-end: React.js, Vue.js, Next.js, Redux Toolkit, Framer Motion
UI Libraries: Tailwind CSS, Shadcn, Mantine UI, Hero UI
Back-end: Node.js, Nest.js, Express, RESTful API, PrismaORM, Sequelize
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git/GitHub, Postman, Swagger, Apidog
Other: Performance Optimization, Problem-Solving

PROJECTS

Technical Support System — Real-time Customer Communication Platform

- Built and sold as an embedded SaaS live-chat solution, integrated into 10+ production platforms
- Implemented WebSocket-powered real-time chat for instant, two-way communication between users and live agents
- Added bot-based self-service with interactive decision-tree navigation to deflect repetitive support requests
- Built a full ticketing system for creating, viewing, and managing hundreds of daily support tickets
- Localized the interface in 4 languages: Arabic, English, Central Kurdish (Sorani), and Northern Kurdish (Kurmanji)
- Made the UI fully themeable with configurable colors to match each client's branding
- Built with Material Design 3 components for a modern, responsive interface
- Designed a stateless architecture where the host application owns all persistent data
- Secured access with API-key and token-based authentication

Dashboard Entrepreneurship — Ministry of Higher Education
- Built a control panel managing 1.5 million+ student and project records
- Implemented role-based access control supporting 50+ distinct user roles
- Streamlined the project creation and review workflow, cutting approval turnaround
- Developed a messaging system for students and authorities handling thousands of messages daily

Dashboard Riyada — Entrepreneurship Directorate
- Built an administrative control panel managing data for 500,000+ users
- Implemented dynamic roles and permissions with fine-grained access control across 15+ permission levels
- Optimized data-handling tools for noticeably faster queries at scale
- Crafted a modern UI/UX that stays smooth and responsive under heavy load

Dashboard Archive Documents — Baghdad Chamber of Commerce
- Built a document archive system managing 85,000+ importer and exporter records with fast search
- Designed a dual-panel system with separate manager and employee interfaces to speed up data entry
- Implemented role-based permissions for secure document access across 8 permission tiers
- Delivered a clean, responsive interface supporting thousands of concurrent users

Hospital System
- Built a hospital management system for room scanning and inventory tracking across 200+ rooms
- Added real-time display of rooms, equipment, and item availability
- Implemented role-based access control for medical staff across 15+ departments
- Designed a responsive interface that improved inventory accuracy and day-to-day operations

Electronic Voting Dashboard
- Built an integrated control panel for electronic voting and reporting at the scale of tens of thousands of voters
- Built a vote-management system with real-time results tracking
- Implemented secure role-based permissions for administrators across 3 administrative levels
- Developed comprehensive reporting and analytics with 15+ customizable reports

EDUCATION

High School Diploma — Jerusalem School *2026*
